# Sepa.

Today, **Sepa** is a global reference point open to everyone. Developing Periodontology and promoting healthcare guide Sepa's daily work. Its commitment to science, research, education, and the improvement of the oral and general health of the overall population make the SEPA Foundation an international reference point. With participants from more than 60 countries, over 6,000 attendees in 2019, and over 42,000 registered users during Sepa OnAir 2020, the Periodontology and Oral Health congress has become the meeting point for all professionals linked to the dentistry industry seeking to be at the forefront of knowledge and excellence, all while working closely with other healthcare professionals. Sepa's training program and its publications *Periodoncia Clínica*, *Cuida tus Encías*, and Sepa TV are clear examples of its commitment to scientific dissemination.

**Periodontology and Oral Health for All** are the objective for an entity backed by a scientific society with more than 60 years of history and with solid values: Rigor, Innovation, Excellence, Transparency, and Ethics. The pandemic that began in March 2020 has presented new challenges and opportunities to the dental community, to which Sepa wishes to respond along with you, by accompanying you in the never-ending improvement of your continuous training, your clinic, and by raising awareness among the population to promote oral and general healthcare.

**Sepa is moving forward along with you..**

## ORAL HEALTH AND PERIODONTOLOGY FOR ALL

### Sepa Foundation Board of Trustees 2019-2022

**Ignacio Sanz Sánchez**

President of the Sepa 2021 Organizing Committee

**Ignacio Sanz Martín**

President of the Sepa 2021 Scientific Committee

In 2020 SEPA was forced to postpone its in-person congress due to the threat of the pandemic. In a remarkable effort, SEPA managed to transform the training landscape and moved to an online format that it had already been developing. Sepa OnAir 2020 was a window into which professionals could peer to continue learning and developing their skills. Given the recent recovery of the healthcare situation and taking all the necessary precautionary measures to ensure a safe congress for its attendees, SEPA has opted for the return to in-person formats with a congress that lives up to the expectations of professionals who have waited more than two years to be able to meet again in a scientific forum.

The development of Periodontology and the promotion of oral health continue to be the focal points of this annual meeting. With an interdisciplinary program focused on bringing professionals all the latest to allow them to provide patients with the best treatments, SEPA hopes to recover everything that its annual meetings represent for all those oral healthcare professionals who wish to be at the forefront of knowledge and excellence in clinical care.

"Periodontology and oral health for all" are the main purpose of a scientific entity with more than 60 years of history and with solid values based on rigor, innovation, excellence, transparency, and ethics. Faced with the future challenges of oral healthcare professionals, SEPA aspires to continue accompanying you on the path to developing Periodontology and improving the oral and general healthcare of the overall population.

## Tord Berglundh Platinum Award Sepa 2021

Tord Berglundh is the SEPA Foundation 2021 Platinum Award winner. His career and his enormous contribution to the development of Periodontology make him worthy of the highest distinction granted by SEPA along with names such as Jan Lindhe, Klaus Lang, Raúl Caffesse, José Javier Echeverría, Robert Genco, Maurizio Tonetti, and Mariano Sanz.

Tord Berglundh is Professor and Director of the Periodontology Department of the Sahlgrenska Academy's School of Dentistry at the University of Gothenburg in Sweden.

Professor Berglundh graduated from the University of Gothenburg with a DDS in 1978 and received his degree in odontology and his certificate as specialist in periodontics in 1992. He received his PhD in 1993. He was appointed associate professor in 1994 and then full professor in periodontology in 2002 at the University of Gothenburg, where he has served since 1981.

Professor Berglundh is associate editor of the journals Clinical Oral Implants Research and the EFP's Journal of Clinical Periodontology. He is a member of the editorial board of the Journal of Dental Research and serves as a referee on several other journals. He has received numerous scientific awards and produced about 230 scientific publications within the field of dental implants, periodontal and peri-implant diseases, immunology, genetics, tissue integration, and regeneration.

His great scientific legacy, his relevance to global Periodontology, and his proximity to Spain have contributed to his name being engraved in the SEPA Foundation's Platinum Award.

The **Platinum Award of the SEPA Foundation** is the highest distinction of this scientific entity, created by the Spanish Society of Periodontology and Osseointegration in 2011.

It recognizes the contribution and merits of researchers and clinicians of recognized prestige in the development of Periodontology in Spain and around the world.

Since 2012, the SEPA Platinum Award has been awarded to:

- 2012 Jan Lindhe
- 2013 Klaus Lang
- 2014 Raúl Caffesse
- 2015 José Javier Echeverría
- 2017 Robert Genco
- 2018 Maurizio Tonetti
- 2019 Mariano Sanz
- 2020 Tord Berglundh

### Symposium: New frontiers in immediate implants. Surgical techniques.

Moderator and presenter:  
Laurence Adriaens

#### What is the aesthetic predictability with immediate implants?

David García Baeza

#### How much can we compensate for the volume in the aesthetic area with connective tissue grafts?

Jan Cosyn

#### What are the results in immediate implants without vestibular cortical?

Robert Noelken

Debate.

### Sesión Red temática periimplantitis. Mesa Redonda: Resultados de la Investigación en Enfermedades Periimplantarias.

Moderan and presenta: José Nart

#### Biofilm en Peri-implantitis, ¿descontaminación química and mecánica?

Mariano Sanz

#### Modificación de la superficie de los implantes con estrategias antimicrobianas.

Javier Gil and Conrado Aparicio

#### ¿Cuándo funciona el tratamiento no quirúrgico de la periimplantitis?

Juan Blanco

#### Enfoques quirúrgicos de éxito en el manejo de la periimplantitis.

Alberto Monje

#### Nano partículas poliméricas como antimicrobiano.

Raquel Osorio

### Symposium: Treatment of Stage IV Periodontitis.

Moderator and presenter: David Herrera and Ignacio Sanz Sánchez

#### Treatment of pathological dental migration.

Conchita Martín

#### Treatment of tooth loss/ masticatory dysfunction/bite collapse in partial edentulism.

Ana Molina

#### Treatment of tooth loss/ masticatory dysfunction/bite collapse in terminal dentition.

Ausra Ramanauskaitė

#### Long-term variables and impact of treatment in patients with stage IV periodontitis.

Eva Muñoz
